

RED LINE LEAD SUBSTITUTE

- Prevents valve seat damage in engines designed for leaded gasoline
- Prolongs the useful life of older engines without updated valve seats
- Also cleans carburetor deposits and injectors, safe for catalytic converters.
- For racing, marine or off-road use only

PACKAGE SIZES:

60202 - Lead Substitute - 12oz

ADDITIONAL INFORMATION

Red Line Lead Substitute is a fuel additive designed for older gasoline/petrol engines which suffer from excessive valve seat wear and piston scuffing when operated on low-lead or unleaded fuels. Many engines designed for leaded fuel, even with hardened valve seats, can fail in as little as 60 hours under high load with inadequate levels of lead.

Directions:

Add one bottle per tank of fuel. Treats up to 25 gallons

For health safety information, please refer to the Safety Data Sheet at REDLINEOIL.COM
